Paper packaging

Our Paper Packaging Division Has been operational since the early 2000s. Started as only a complement to our commercial printing segment , the Packaging Division has grew exponentially through the years, producing name brand export goods , International cosmetic packaging and various local pharmaceutical companies.

Quality Assurance and efficiency

Equipped with complete Start to finish packaging in-house production equipment, efficiency and quality checks has never been more accessible. From various size of offset printing machine availability to multiple finishing machines (i.e Matte lamination, Gloss Lamination, Hot foiling machine, waterbase, chemical embossing, Spot UV and UV) Mega Indah can offer the best quality products within the most efficient time frame. To increase quality assurance, we have also invested in more quality standardization equipment and training for our plant to use , our operators are equipped with Densito Meters and other colour management systems to ensure quality does not go unnoticed
